10W LED Aluminum Flashlight

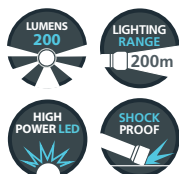

- high power LED
- 700 lumens
- lighting range: 350m
- size: 24.8 x 3.9cm
- shock proof
- colour: silver

for 3 x LR14 C batteries (not included)

4 260030 255375

Art.-No. **307 00033** Qty innerbox **10** Qty outerbox **40**

5W LED Aluminum Flashlight

- high power LED
- 200 lumens
- lighting range: 200m
- size: 24.0 x 3.9cm
- shock proof
- colour: black

for 3 x LR14 C batteries (not included)

4 260030 255405

Art.-No. **307 00016** Qty innerbox **10** Qty outerbox **40**

3W LED Zoom Aluminum Flashlight

- high power LED
- 170 lumens
- lighting range: 150m
- size: 15 x 3.5cm
- shock proof
- colour: black

incl. 3 x LR03 AAA Alkaline batteries

4 260030 255399

Art.-No. **307 00015** Qty innerbox **10** Qty outerbox **40**

Flashlights

1W LED Aluminum Flashlight

- high power LED
- 100 lumens
- size: 9.5 x 2.5cm
- shock proof
- with blunt edge
- colour: black

incl. 1 x LR6 AA Digi Alkaline batteries

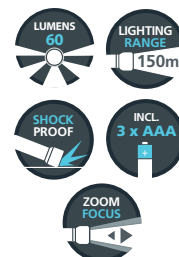

Art.-No. **307 00034** Qty innerbox **30** Qty outerbox **120**

1W LED Zoom Flashlight

- 60 lumens
- zoom function
- lighting range: 150m
- size: 10.7 x 3.2cm
- shock proof
- colour: black

incl. 3 x R03 AAA batteries

Art.-No. **307 00020** Qty innerbox **30** Qty outerbox **120**

Compact and handy.

4 260030 259236

28 LED Aluminum Flashlight

- size: 13.2 x 4.5cm
- colours: silver, black

incl. 3 x R03 AAA batteries

Art.-No. **307 00004** Qty innerbox **15** Qty outerbox **60**

4 260030 259335

9 LED Aluminum Flashlight

- size: 9 x 2.6cm
- colours: silver, black

inkl. 3 x R03 AAA batteries

Art.-No. **307 00006** Qty innerbox **30** Qty outerbox **120**

4 260030 259175

Classical Torch

- longlife bulb
- size: 14.7 x 3.6cm
- colours: red, yellow, blue, black

for 2 x R6 AA batteries (not included)

Art.-No. **307 50001** Qty innerbox **30** Qty outerbox **60**

Headlights

ARCAS headlights are versatile usable and do not exite only cave explorers but also jogger, bicyclists and dog owners. From conventional LEDs to modern COB light everything is available.

Environmental Regulations

arcas[®]

EU standards

All products by ARCAS meet current EU directives.

The green Dot reflects the desire again, to contribute to environmental protection. All ARCAS products are regularly controlled by public testing institutes on environmental and certified with current test certificates. These can be requested if required.

The CE marking harmonizes the regulations and technical standards in every member state. Moreover all tests and certification results are in the EU by reason of the mutual accepted common directives. The CE marking can be seen as a „technical passport“ of the product. With the CE marking we declare, that our ARCAS products meet the requirements of the applicable EC directives.

The RoHS means “Restriction of the use of certain hazardous substances in electrical and electronic equipment” and aims to restrict certain dangerous substances like different heavy metals used in electrical and electronic equipment according to the EU directive 2011/65/EU. All ARCAS products are tested according to the scope of RoHS. Since it requires the CE marking, separate marking on the products is not necessary.

Disposal of old devices

Waste of electrical and electronic equipment (EEE) which consists of noxious substances are marked with a crossed-out wheel bin. This EEE does not belong to the household garbage, but to a separate waste disposal. For a proper and free disposal, there are municipal collections available. Electrical and electronic equipment, which is purchased from us, can be brought or sent back to us (ADA Import & Großvertriebs GmbH, Bergiusstraße 53-59, 12057 Berlin).

Battery notes

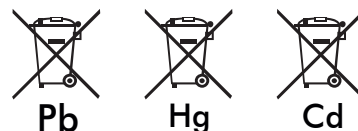

- For normal storage the temperature should be between +10°C and +25°C and should not exceed +30°C. Extreme values of relative humidity (above 95% and below 40% relative humidity) for a long time must be avoided. Batteries should not be stored near radiators and boilers or directly under sunlight.
- It is advantageous to remove the batteries from a device that does not work properly or if it is not in use for long periods (e.g. cameras, flash units etc.).
- All batteries should be replaced at the same time. Newly purchased batteries should not be used together with partially discharged batteries.
- Batteries of different electrochemical systems, grades or trademarks should not be used together.

Batteries must be disposed properly. The retail and communities provide appropriate container for disposal.

Discharged batteries that we currently have or formerly had in our assortment, can be brought or sent back to us (ADA Import & Großvertriebs GmbH, Bergiusstraße 53-59, 12057 Berlin).

The symbols on the batteries have following meaning:

Pb = Battery contains more than 0,004 mass percent lead
Hg = Battery contains more than 0,0005 mass percent mercury
Cd = Battery contains more than 0,002 mass percent cadmium

Charger + Rechargeables

Energy - everytime and everywhere

ARCAS provides in the range of charging technology for outdoors or for home the optimal solution for every situation. Power banks, car charger, wall charger and rechargeables supply mobile energy.
